

**CERAMIC TILE****REPRESENT**

Walls
Ceilings
Sanitary Fixtures

GENERAL

Although these surfaces can be successfully coated as detailed below, it is a complicated process using sophisticated products. Most homeowners would do well to replace these surfaces rather than coat them.

SURFACE PREPARATION

WARNING! If you scrape, sand or remove old paint from any surface, you may release lead dust. **LEAD IS TOXIC. EXPOSURE TO LEAD DUST CAN CAUSE SERIOUS ILLNESS, SUCH AS BRAIN DAMAGE, ESPECIALLY IN CHILDREN. PREGNANT WOMEN SHOULD ALSO AVOID EXPOSURE.** Wear a NIOSH-approved respirator to control lead exposure. Carefully clean up with a wet mop or HEPA vacuum. Before you start, find out how to protect yourself and your family by contacting the U.S. EPA/Lead Information Hotline at 1-800-424-LEAD (5323) or log on to www.epa.gov/lead.

- Scrub thoroughly with TSP and water
- Rinse with clean water
- Etch with 20% Muriatic Acid
- Rinse with clean water
- Dry thoroughly before applying primer

PRIMERS

Use Grip-Coat® 6906 Vinyl Wash Primer as a tie-coat to insure adhesion of the finish coat.
